

## Orthopaedics – Reconstruction of Ligament

### Introduction

The Covid pandemic has had a significant impact on the NHS ability to provide routine elective services. We recognise that patients are waiting longer than we would all like and it is not always possible to identify when treatment will take place. This document provides you with information on how you are able to support yourself while waiting to attend the hospital. The guidance has been written by clinicians who are responsible for your care.

### Guidance for Patients

These procedures are considered high priority to the Trust and we are doing our best to schedule surgery in a timely way.

There are things you can do to stay well and get your body ready for surgery or other hospital treatment. This will also help you feel more in control. Even small changes can make a big difference to your health.

- Stop smoking to improve your body's ability to heal and to improve your lung function. Guidance on the support available to help you stop smoking can be found on [the NICE website](#).
- Eat a healthy diet to help your body manage the demands of surgery and aid recovery. For tips on helping you to start healthier eating habits, be more active and start losing weight, download the [free NHS Weight Loss Plan](#).
- Reduce your alcohol intake to less than 14 units per week as recommended for both male and female (or preferably below). This will improve your ability to heal after surgery.
- Take care of your mental health by preparing yourself for your appointment/procedure, to help reduce anxiety and stress.
- Take your prescribed medication as instructed.

The Trust has patient information leaflets with regards to Anterior Cruciate Ligament, these can be found on the RJAH website or please click the link below:

[RJAH Patient ACL Information Leaflet](#)

Or to view all of our leaflets please log on to our website <https://www.rjah.nhs.uk/> and under the For Patients section, select patient leaflets.

## **My Planned Care Patient Information Platform**

### **What should I do if my health is deteriorating?**

If you feel that your condition is worsening, or you have developed further symptoms please contact your General Practitioner or your Consultants secretary in the first instance.

If you are unable to speak to your GP please call 111 for advice or visit <https://111.nhs.uk/>

For something life threatening – severe bleeding, breathing difficulties or chest pains – please dial 999.

### **Contact Us**

Email : [rjah.accesspatientqueries@nhs.net](mailto:rjah.accesspatientqueries@nhs.net)

Please note: This mailbox is monitored Monday-Friday during office hours.

Outside of these times please use 111 as indicated above.
