

Paediatric Orthopaedics – First Outpatient Appointment

Introduction

The Covid pandemic has had a significant impact on the NHS ability to provide routine elective services. We recognise that patients are waiting longer than we would all like and it is not always possible to identify when treatment will take place. This document provides you with information on how you are able to support yourself while waiting to attend the hospital. The guidance has been written by clinicians who are responsible for your care.

Guidance for Patients

There are things you can do to stay well and get your body ready for surgery or other hospital treatment. This will also help you feel more in control. Even small changes can make a big difference to your health.

- If appropriate, exercise regularly to improve your muscle strength. You will find gentle walking and swimming beneficial.
- If appropriate, ensure you wear the splints or orthoses you have been provided.
- Eating a healthy diet is important for a child's development and can help the body manage the demands of surgery and aid recovery. For tips on helping you to start healthier eating habits, be more active and start losing weight, download the free <u>NHS Weight Loss Plan</u>.
- Creating a smoke free home, if you or a family member would like support in stopping smoking guidance can be found on the <u>NICE website</u>.
- Take care of your mental health by preparing yourself for your appointment/procedure, to help reduce anxiety and stress.
- Take your prescribed medication as instructed.

General information about the Trust can be found on the RJAH website or please click the link below:

RJAH General Information patient Leaflet

To view all of our patient leaflets please log on to our website <u>https://www.rjah.nhs.uk/</u> and under the For Patients section, select patient leaflets.

What should I do if my health is deteriorating?

My Planned Care Patient Information Platform

If you feel that your condition is worsening, or you have developed further symptoms please contact your General Practitioner in the first instance and they will either be able to support you or inform your Consultant about your condition if they feel that this is appropriate.

If you are unable to speak to your GP please call 111 for advice or visit <u>https://111.nhs.uk/</u>

For something life threatening – severe bleeding, breathing difficulties or chest pains – please dial 999.
