

General Neurology – All Neurology Procedures & Contact Information

Introduction

The Covid pandemic has had a significant impact on the NHS ability to provide routine elective services. We recognise that patients are waiting longer than we would all like and, it is not always possible to identify when treatments/appointments will take place. This document provides you with information on how you are able to support yourself while waiting to attend the hospital.

Guidance for Patients

In order to reassure you, if you are waiting a neurological procedure please contact the associated coordinator on the relevant number provided below or gain further information via the online websites provided.
