

## Surgical Division – ENT - Septoplasty

### Introduction

Your consultant has recommended a Septoplasty – a procedure done under General Anaesthetic to straighten a deviated septum. This is intended to improve nasal airway. You would have been provided with a written information leaflet that provides details on the procedure when you were listed for the operation at your clinic appointment.

### Guidance for Patients

Common reasons for a Septoplasty include:

- Deviated nasal septum causing nasal blockage
- As part of a Septo-rhinoplasty operation

### What should I do if my health is deteriorating?

If you feel you are becoming more unwell, please contact your GP or NHS 111 for a medical review in the first instance. They will be able to direct you to the appropriate service to determine your management plan.
