

Introduction

We are reviewing patients who have been waiting a long time to help us prioritise those in most urgent need. Please be assured we are doing our utmost to ensure you and your families get the treatment you require as soon as possible. This document will provide you with information on how you can support yourself whilst waiting to attend the hospital.

Take Your Medication

When taking medication, you should always;

- Take it at the right time of day and at the dose recommended by your GP/Pharmacist.
- Check instructions to make sure you're taking it properly. Some medicines should only be taken before a meal or with water or food.
- Use your own supply and never take medication prescribed for someone else.

It is important to let your GP or pharmacist know if you experience any side effects as they may decide to change the dose or try a different medicine for you. Please see the link below for further advice and guidance;

Keep Moving

Physical activity is good for your body and mind. Adults should aim to be active every day. A daily brisk walk can boost your energy, lift your mood and make everyday activities easier. To stay fit and healthy, it's recommended you get at least 150 minutes of moderate physical activity a week, or around 20 to 30 minutes a day.

For some useful tips on how to stay fit and healthy please visit;
